

AI-powered contract review that catches the risks lawyers miss — in seconds, not hours.

Problems

The Cost of Counsel.

Legal review is required for every agreement – but outside counsel costs \$250–400/hour.

Time consuming.

Deal speed keeps rising, but legal review can't scale with it.

Risks slip through.

Missed clauses – hidden fees, bad terms, liability gaps – become real fallout.

No consistent standard.

Every reviewer flags different things – risk assessment depends on who's doing the reading.

Solutions

Instant Upload

Drop in any lease, purchase agreement, or property contract.

AI-powered Flagging

Scans contracts in seconds, flagging risky or unusual clauses.

Plain-English Explanations

Every flag comes with a clear rationale and a suggested redline.

Built for Deal Speed

Move fast without cutting corners.

Market Size

TAM: \$30B

Global real estate legal
services market.

SAM: \$4B

Contract review software for
real estate law practices and
brokerages.

SOM: \$60M

Small-size real estate
law practices adopting
AI contract tools.

Product

Traction

Early signal: fast adoption in deal-heavy workflows.

A white square with rounded corners containing the number 10 in a dark blue, bold, sans-serif font.

Paying customers (small real estate lawyers).

Average contract review time reduced from 40 min to 7 min.

Month-2 retention.

Business Model

B2B SaaS — seat-based pricing

\$99 /seat/month
up to 10 seats

\$79 /seat/month
11–50 seats

**Custom
pricing** large brokerages /
property
management firms

Roadmap

Q1:

Expand clause library across residential and commercial real estate.

Q3:

Launch integrations with DocuSign and major real estate transaction platforms.

Q2:

Grow to 40 paying practices.

Q4:

Expand into a second market or add commercial lease specialization.
